Dear FDA,

Genetically Engineered foods have no place on my table. I am very concerned about your new proposed rule and guidance on genetically engineered foods. Voluntary labeling basically means no labeling and does nothing to protect the health of my family and the environment.

Consumers should be able to choose what type of "food" we are eating. There should be no GE foods allowed in the first place until it is shown to be safe for human health and the environment.

Thank you for your consideration.

Sincerely,

Nancy Cohn-Burke
