Dear [Firstname],

Have you had it with "diets" that don't work? With weight-loss products that lighten only your wallet? If so. . . don't give up. I want to tell you about a revolutionary new product that does just one thing. . . but does it amazingly well.

Free for 30 Days!

Better yet, I'm going to put my money where my mouth is. . . by letting you try it free for 30 days.

Why do most people, despite their best efforts, fail to lose weight? The answer is simple. They eat too much! And three out of four people who overeat consume too many carbohydrates, particularly the starchy carbohydrates found in pastas, potatoes and breads. Why? Because these are exactly the foods most of us love.

But here's a little secret I'd like to share that you don't know: It's not what you eat that makes you fat, it's. . .

How much you digest.

Think about that for a moment. What if you could eat a plateful of pasta, but only digest some of it?

Impossible, you say?

Not at all. You see, starchy carbohydrates are just too large to be absorbed through the small intestine. They have to be broken down into smaller molecules, which is the job of the enzyme, alpha amylase.

Here's the important thing: no alpha amylase, no digestion. If you suppress this enzyme, you can eat some of the starchy foods you love. . .

Without blowing your diet!

CarbEater, a new diet supplement, contains an ingredient that does exactly that - inhibits the action of alpha amylase.

Do I have your attention, [Firstname]?

When you combine CarbEater™ with healthy diet and exercise, some of those starches and carbs you eat will pass right through your digestive system. . .
