RE: Label Claims/Disclaimers

Dear Mr. Moore

This letter is to notify you that Enzymatic Therapy, Inc. at 825 Challenger Drive, Green Bay, Wisconsin 54311 is a distributor and has included statements provided for by section 403(r)(6) of the Food, Drug, and Cosmetic Act on the labels of the following product. These claims are not necessarily for a product we currently market or plan to market in the immediate future, and may be exploratory in nature.

COMPANY	PRODUCT NAME	DIETARY INGREDIENTS	STATEMENTS
Enzymatic Therapy, Inc.	Pure Rip™ with DIM	Indoplex® Complex modified food starch, 25% diindolylmethane (DIM), d-alpha tocopheryl succinate, silicon dioxide, and phosphatidylcholine	The role of DIM in the human body is to support healthy estrogen metabolism and hormonal balance.*

I certify that the information contained in this notice is complete and accurate and that Enzymatic Therapy, Inc. has substantiation that the statements are truthful and not misleading.

COMPANY	PRODUCT NAME	DIETARY INGREDIENTS	STATEMENTS
Enzymatic Therapy, Inc.	Pure Rip™ with DIM	Indoplex® Complex modified food starch, 25% diindolylmethane (DIM), d-alpha tocopheryl succinate, silicon dioxide, and phosphatidylcholine	Metabolism occurring via the C-2 pathway increases the chances for estrogen to be broken down into 2-hydroxyestrone (2-OH1) and 2-hydroxyestradiol (2-OH2), estrogen metabolites known for their health supporting activities.* Once 2-OH1 and 2-OH2 are present in the circulation, further metabolism results in 2-methoxyestrone and 2-methoxyestradiol. These critical metabolites have been shown to promote healthy cell development in animals and humans.*

RE: Label Claims/Disclaimers

Dear Mr. Moore:

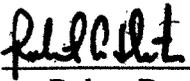

This letter is to notify you that Enzymatic Therapy, Inc. at 825 Challenger Drive, Green Bay, Wisconsin 54311 is a distributor and has included statements provided for by section 403(r)(6) of the Food, Drug, and Cosmetic Act on the labels of the following product. These claims are not necessarily for a product we currently market or plan to market in the immediate future, and may be exploratory in nature.

COMPANY	PRODUCT NAME	DIETARY INGREDIENTS	STATEMENTS
Enzymatic Therapy, Inc.	Pure Rip™ with DIM	Indoplex® Complex modified food starch, 25% diindolylmethane (DIM), d-alpha tocopheryl succinate, silicon dioxide, and phosphatidylcholine	It has been noted that dietary supplements containing other cruciferous phytochemicals, most notable I3C, claim to provide the same estrogen balancing benefits as DIM in Pure Rip™ with DIM. However, I3C is highly unstable and has no biologic activity until it is converted to DIM. Conversion of I3C takes place in the stomach and requires an appropriately acidic environment. In contrast to I3C, DIM is highly stable, requires no conversion in the stomach, and is the most active cruciferous phytonutrient in promoting beneficial estrogen metabolism.*
