RE: Label Claims/Disclaimers

Dear Mr. Moore:

This letter is to notify you that Enzymatic Therapy, Inc. at 825 Challenger Drive, Green Bay, Wisconsin 54311 is a distributor and has included statements provided for by section 403(r)(6) of the Food, Drug, and Cosmetic Act on the labels of the following product. These claims are not necessarily for a product we currently market or plan to market in the immediate future, and may be exploratory in nature.

<u>COMPANY</u>	<u>PRODUCT NAME</u>	<u>DIETARY INGREDIENTS</u>	<u>STATEMENTS</u>
Enzymatic Therapy, Inc.	Metal Magnet™	Proprietary Humifulvate Complex humic, fulvic and phenolic acid	Metal Magnet contains a proprietary mixture of humic, fulvic, and phenolic acids known as Humifulvate®. In the body, these compounds act as metal chelators, binding heavy metals so that they can more easily be excreted.*

I certify that the information contained in this notice is complete and accurate and that Enzymatic Therapy, Inc. has submitted that the statements are truthful and not misleading.

RE: Label Claims/Disclaimers

Dear Mr. Moore:

This letter is to notify you that Enzymatic Therapy, Inc. at 825 Challenger Drive, Green Bay, Wisconsin 54311 is a distributor and has included statements provided for by section 403(r)(6) of the Food, Drug, and Cosmetic Act on the labels of the following product. These claims are not necessarily for a product we currently market or plan to market in the immediate future, and may be exploratory in nature.

<u>COMPANY</u>	<u>PRODUCT NAME</u>	<u>DIETARY INGREDIENTS</u>	<u>STATEMENTS</u>
Enzymatic Therapy, Inc.	Metal Magnet™	Proprietary Humifulvate Complex humic, fulvic and phenolic acid	Humifulvate, an extract from Hungarian peat, is a mixture of humic acid, fulvic acid and phenolic acids. These acids are organic compounds that act as organic mineral carriers and detoxifiers.* Their beneficial effects are due to their ability to bind, or chelate (from the Greek word <i>chele</i> , meaning claw) heavy metals that are then excreted by the body.* However, the chelation is selective. Humifulvate does not cause depletion of beneficial minerals.*

I certify that the information contained in this notice is complete and accurate and that Enzymatic Therapy, Inc. has substantiation that the statements are truthful and not misleading.

These claims are not necessarily for a product we currently market or plan to market in the immediate future, and may be exploratory in nature.

<u>COMPANY</u>	<u>PRODUCT NAME</u>	<u>DIETARY INGREDIENTS</u>	<u>STATEMENTS</u>
Enzymatic Therapy, Inc.	Metal Magnet™	Proprietary Humifulvate Complex humic, fulvic and phenolic acid	In a recent laboratory study, humic and fulvic acids (as dissolved organic carbon) in water both bound to and limited uptake of cadmium.* In comparison to placebo, cadmium retention in the kidneys was reduced by 46%, 24 hours after administration.*

I certify that the information contained in this notice is complete and accurate and that Enzymatic Therapy, Inc. has substantiation that the statements are truthful and not misleading.

<u>COMPANY</u>	<u>PRODUCT NAME</u>	<u>DIETARY INGREDIENTS</u>	<u>STATEMENTS</u>
Enzymatic Therapy, Inc.	Metal Magnet™	Proprietary Humifulvate Complex humic, fulvic and phenolic acid	In a separate study specifically on Humifulvate (in combination with trace minerals) in a laboratory setting, Humifulvate was associated with a dose dependent increase in mercury excretion, meaning more mercury was excreted from the body.*

I certify that the information contained in this notice is complete and accurate and that Enzymatic Therapy, Inc. has substantiation that the statements are truthful and not misleading.
