To Whom It May Concern:

Nature's Way Products, Inc. wishes to notify the Food and Drug Administration that it has, within the past 30 days, commenced marketing a dietary supplement which bears a statement under Section 403(r)(6) of the Federal Food, Drug and Cosmetic Act.

The dietary supplement for which the statement is made is Thisilyn Cleanse with Mineral Digestive Sweep. The dietary ingredients that are the subject of the statement are Milk Thistle, Artichoke, Fructooligosaccharides, and Magnesium hydroxide. The statement reads as follows:

"Standardized milk thistle extract is the most clinically researched supplement for supporting the liver, and Thisilyn Cleanse provides a clinically optimal dose. Its bioflavonoid complex (silymarin) promotes healthy liver function. A perfectly balanced formula featuring Thisilyn, Artichoke, Turmeric, Dandelion and two proprietary herbal blends to support the cleansing of multiple body systems, including: the bloodstream, gallbladder, liver, lymphatic system, skin and urinary tract. Also promotes the transport of toxins and impurities to the intestine. FOS (fructooligosaccharides) provides a powerful prebiotic boost to support the maintenance of healthy intestinal microflora. A unique digestive cleanse with Magnesium hydroxide, Triphala and Thisilyn to encourage the cleansing of impurities and toxins through the bowel. Magnesium hydroxide encourages healthy elimination by drawing water into the intestine, causing waste material to soften and swell, and creating pressure in the colon. The body responds by promptly cleansing the bowel."
