SUBJECT: Confidentiality of data to demonstrate safety and effectiveness of piroctone olamine

DISCUSSION

Keith placed a call to Ms. Finn. We told her we needed to verify that the data submitted to support the safety and effectiveness of piroctone olamine did not contain any confidential information and could be made publicly available in Dockets. Ms. Finn did not think any of the data was confidential but was going to check with others at P&G. If there was a consensus that nothing in the data is confidential, Ms. Finn indicated that she would send a letter to Div. Dockets Management affirming the data can be made publicly available. She will FAX us a copy of the letter.
