

## 2000 National statistics

### Statistics for all U.S. hospital stays, 2000

	Number of discharges	% of discharges	Mean charges (dollars)	Mean costs (dollars)	Mean length of stay (days)	% Died	% Male	Mean age	National bill
All hospital stays	36,417,565	100.0	\$ 13,733	\$ 6,046	4.6	2.4	40.7	47	499,228,055,196

Weighted national estimates from HCUP Nationwide Inpatient Sample (NIS), 2000, Agency for Healthcare Research and Quality (AHRQ), based on data collected by individual States and provided to AHRQ by the States. Total number of weighted discharges in the U.S. based on HCUP NIS = 36,417,565. Statistics based on estimates with a relative standard error (standard error / weighted estimate) greater than 0.30 or with standard error = 0 in the nationwide statistics (NIS and KID) are not reliable. These statistics are suppressed and are designated with an asterisk (\*). The estimates of standard errors in HCUPnet were calculated using SUDAAN software. These estimates may differ slightly if other software packages are used to calculate variances.
