

I'm deeply concerned about the proposed regulation for food registration do to the bioterrorism legislation.
alanbe companies are distributors of grocery and food products. all products that we purchase are shipped to outside warehouse facilities. we do not own or do we operate these warehouses. everything such as receiving, shipping, and trucking are out sourced. we do not see the product upon arrival, we do not see the products upon departure. no cartons are are opened, all cases are shipped exactly as they are received . my purpose in writing to you is to let you know that we are not alone in this scenario we know of over 30 companies that handle food products exactly as we do. in short distributors must be excluded from this regulation. distributors handle sealed cases only.
