Re: Docket No. 2004P-0448/CP1

Dear Mr. Roth:

On page 9 of your above-referenced citizen petition, the petition states that "the Agency required Hill to conduct specific stability studies demonstrating the compatibility of the shower cap with the finished product."

However, you did not submit to the docket any documentation in connection with this statement. Please identify the basis for that assertion and submit supporting documentation, if you have any, to Division of Dockets Management and reference Docket No. 2004P-0448.

Thank you for your prompt attention.

Sincerely,

Jane A. Axelrad  
Associate Director for Policy
