

**D) HEALTH CLAIM STATEMENT**

Petitioner proposes that a qualified health claim be authorized for labeling of Cognis' Xangold<sup>®</sup> lutein esters in dietary supplements and for foods containing the product as follows:

**Consumption of 12 mg Xangold lutein esters per day may reduce the risk of age-related macular degeneration and cataract formation. FDA has determined that the evidence is supportive, but not conclusive, for this claim. (This food/dietary supplement provides \_ mg lutein esters per serving).**
