Tariff and Non-tariff Barriers

Tariffs on poultry meat exports range from duty free in Hong Kong and Singapore to over 35 percent to Mexico, India, and Pakistan. Hong Kong is the leading market for U.S. poultry exports. Russia, the second largest market for U.S. poultry, has a tariff of 15 percent. Japan's tariffs are about 12 on chicken and three percent on turkey meat. U.S. exports of poultry meat to Canada, the EU, and Korea are subject to tariff-rate quotas, with over-quota tariff rates that can be prohibitive.

Regional Trade Agreements (RTAs) provide preferential tariffs to member countries. International trade in poultry is highly influenced by regional trade agreements. Association agreements between the EU and several Eastern European countries have been established in which quotas on poultry are established and tariffs imposed at 80 percent of the EU's MFN rate. A recent free trade agreement between the EU and Mexico (July 2000) could impact U.S. exports of poultry over the long term. Similarly, the Asean Free Trade Area (AFTA) could affect sales of U.S. processed poultry products when it comes into force due to increased competition from Thailand in Indonesia, Malaysia and the Philippines. There are no tariffs on poultry trade between Mercosur countries and

thus U.S. poultry exporters are unable to compete with Brazilian poultry exporters in the region.

Trade barriers on eggs and egg products include the Canadian system of supply management, in which the supply of eggs available on the domestic market is controlled by quotas on domestic production and imports. Japanese egg producers are assisted by a price stabilization program (supported through check-off funds) that compensates them for income losses when prices fall below a predetermined level.

Another key issue increasing affecting egg production worldwide concerns animal welfare and the ethical treatment of animals. In the EU, the Council Directive on minimum standards for the protection of laying hens requires a decrease in bird stocking density and a ban on the use of conventional laying cages by the year 2012 (Germany is proposing that requirements on cages be in effect by 2007). The concern among producers is that this directive will increase the price of eggs and reduce consumption. McDonald's Corp (which uses about 2.5 percent of total U.S. egg production) recently announced that it would purchase eggs only from free-range hens. Industry estimates costs of production will increase between 11 cents/dozen and 24 cents/dozen.

Non-tariff measures and U.S. industry concerns

<u>Measure</u>	<u>Market</u>	<u>Product</u>	<u>Nature of measure</u>
Egg washing	EU	Table eggs	Table eggs can only be classed Grade A if they are unwashed.
Processing	EU	Egg products	Do not allow use of caramel alone as a denaturant in inedible eggs.
Labeling	EU	Table eggs	Proposed legislation would require labeling of method of production - free range, cages, etc.
	Dubai	Table eggs	Imported eggs must be individually stamped with producer's name and date of lay.
	Poland		Requires a bilingual health certificate.
Shelf-life	Mexico	Poultry	Excludes products not labeled in either Spanish or English.
	Dubai	Table eggs	Three month shelf live is considered too short (pack, ship, market).
	Mexico	Eggs	Ban on imports from the U.S. not based on clear criteria.
	Philippines and Indonesia	Poultry meat	Ban on imports from the U.S. not based on clear criteria.
GMOs	Egypt	Poultry meat/products	Bans in violation of WTO rules, according to U.S. industry.
	Mexico	Table eggs/products	Ban on imports from the U.S. not based on clear criteria.
	Several markets	Table eggs/products	Concern over unjustified restrictions not based on science.
SPS restrictions	Several markets	Poultry	Concern over unjustified restrictions not based on science.
	EU	Poultry	EU does not approve certain anti-microbial treatments used in U.S.
Anti-dumping duties	Australia and New Zealand	Poultry	Internal heating requirement considered excessive.
	South Africa	Poultry meat	Method used to determine existence of dumping inconsistent with WTO dumping rules.

NATIONAL YOUNG TURKEY PARTS AND BULK MEAT, FROZEN (UNLESS SPECIFIED), CENTS PER LB., DELIVERED FIRST RECEIVERS, PART AND FULL TRUCKLOTS AS OF 9 NOVEMBER 2001.

Undertone on tom breast meat and destrapped tenderloins was barely steady to weak, wing meat with skin fully steady, breast trim and scapula steady at best. Tom breast meat and destrapped tenderloin demand was light at best with buyers generally unaggressive for the readily available offerings. Demand on wing meat was fair and light on the balance of trims. Offerings light. Thigh meat demand was light to fair with offerings generally held with confidence. Market activity on mechanically separated turkey showed signs of improvement, however, offerings continued readily available. Domestic trading was active on tom breast meat at lower trending prices, balance light. Scapula traded at 128 and frozen destrapped tenderloins at 130 cents transferred-in-storage. Export demand was mixed with drums the most active. Trading light. Fresh tom drums traded at 31-32, mostly 31.50 cents delivered export.
