IPS - SUB-ACUTE TOXICITY**ORAL ADMINISTRATION****TOXICITY BY REPEATED ORAL ADMINISTRATION****RAT**

30 days: 500-1000-1500 mg/kg/day

**NO SIGNIFICANT
ADVERSE EFFECT
RELATED TO DRUG
TREATMENT****DOG
(Beagle)**

28 days: 100-200 mg/kg/day

14 days at 400 mg/kg/day
44 days: 30 days at 800 mg/kg/day

When orally administered in rat at a dose up to 1500 mg/kg daily for a 30 days period IPS showed a very good tolerability. Analogous positive results were obtained in dogs with oral administration of the compound up to 800 mg/kg day for 30 days.
