SECTION 1

The History of Use

*VasoCleaner*TM was a prescribed-herbal preparation for hyperlipidemia and atherosclerosis (AS) in the First Hospital of Beijing Medical University of Chinese Medicine and Pharmacy. Clinical trials show that it is effective in reducing serum cholesterol level. Researches focusing on its pharmacological mechanism on hyperlipidemia and AS have been carried out and the results have been published in many prestigious journals of Chinese medicine in China.

All herbal ingredients used in *VasoCleaner*TM have long history of use in Chinese medicine dated back to 16th Century. They were all recorded in Ben Cao Gang Mu written by Li Shi Zhen, a great doctor in Chinese medicine 400 years ago. They are still used for treating various symptoms and signs today. And their pharmacological effectiveness and the extremely low toxicity were recorded in many Chinese medical books, such as Herbal Encyclopedia of China, approved by Chinese Health Ministry, Grand Dictionary of Chinese Medicine, Zhejiang Medicinal Plant Record. These ingredients are also recorded in many English versions of materia medica, such as Materia Medica, compiled and translated by Dan Bensky, Published by Eastland Press.
