RE: Notification of Nutritional Support Statements

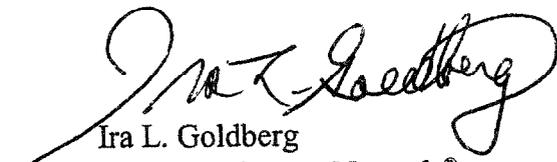

To whom it may concern:

I hereby notify the Food and Drug Administration (FDA) of the use of statements of nutritional support in the labeling of PPC, a dietary supplement. Source Naturals® is the manufacturer of PPC.

Statements being made in the labeling of PPC

- 1) Polyenylphosphatidylcholine (PPC) is pure phosphatidylcholine derived from soy.
- 2) PPC contains no other phospholipids that may compete for absorption.
- 3) Studies show PPC ingestion increases choline levels in the blood and brain, and supports acetylcholine synthesis for proper neuronal and cell function.
- 4) Daily supplementation of PPC may support and maintain healthy brain and liver function; and gastric mucosal protection

To the best of my knowledge and belief, and based upon information available at the time of the execution of this notice, I certify that the above information is accurate and complete. Source Naturals® possesses substantiation that the statements are truthful and not misleading.

  
Ira L. Goldberg  
President, Source Naturals®
