FRONT LABEL: Vitamins of the B group and body metabolites help in efficient utilization of foods and food energy for all body functions.

BACK LABEL: Central and peripheral nervous systems, blood, digestive and circulatory systems, connective tissues, liver and kidneys, hormones and the whole intermediary metabolism are affected by B vitamins. Body metabolites: choline, inositol, and para-aminobenzoic acid (PABA) participate in the metabolic processes called transmethylations, that are important for stabilization of nucleic acids and proteins and coordination of metabolic functions.*
