The text of each structure-function claim for Diet Formula Exercise & Diet Plan is as follows:

(Statement 1) The Excel™ Diet Formula provides a patented combination of amino acids, vitamins, and minerals as part of a sensible diet and exercise program. Excel™ Diet Formula contains the amino acids DL-Phenylalanine, L-Glutamine, L-Tyrosine, and 5-Hydroxytryptophan. Chromium is an essential trace mineral with roles in carbohydrate and fat metabolism. Pyridoxal-5-phosphate is the coenzymatic form of Vitamin B-6, which is important for function of enzymes.

(Statement 2) The Excel™ Diet Formula Plan incorporates the steps needed to achieve the lean hard body you’ve always wanted. By following the complete program, you will have a positive change in your appearance, increased energy and a greater sense of well-being.

(Statement 3) How Excel™ Diet Formula Works: Excel™ Diet Formula normalizes the “Reward System” in your brain by maintaining normal levels of neurotransmitters involved in control of eating behavior. When normal neurotransmitter function is maintained, food intake can be controlled, and carbohydrate binging and craving can be reduced. In a preliminary human clinical trial, Excel™ Diet Formula promoted weight loss at levels comparable to those shown in other clinical trials, and subjects had reduced carbohydrate binging and craving. In another preliminary human trial, Excel™ Diet Formula, when administered after a weight loss program, reduced the amount of weight regain in a two-year time period. Excel™ Diet Formula is safe to use.
