PROFESSIONAL EXPERIENCE

The George Washington University School of Public Health and Health Services, Washington, DC
Dean, August 2010-.
Professor, Environmental and Occupational Health, August 2010-.

The Johns Hopkins University Bloomberg School of Public Health, Baltimore, MD
Professor, Environmental Health Sciences July 2000-August 2010. Joint Appointments in Health Policy and Management and Epidemiology, July 2000 – 2010;
Emergency Medicine, School of Medicine, 2005- 2010.
Visiting Scholar/Adjunct Professor, January 1999 – June 2000

U.S. Environmental Protection Agency, Office of Prevention, Pesticides and Toxic Substances, Washington, DC
Assistant Administrator for Toxic Substances, October 1993 – December 1998,

Consultant (for presidential transition), July 1993 – October 1993.

Appointed by the President and confirmed by the U.S. Senate in October 1993. In this position, I led U.S. pollution prevention, pesticide regulation, toxic substances control, and right-to-know programs. This included a number of policy initiatives on behalf of the EPA Administrator, most significantly, pesticide legislative reform (enacted in 1996 and implemented in 1997-98); expansion of the Toxics Release Inventory; a voluntary initiative to generate toxicity screening information for high volume chemicals; a consensus approach to screening and testing chemicals for endocrine disruptor potential; standards to implement of the 1992 Lead Poisoning Prevention Act; children's environmental health policies including participation in developing a Presidential Executive Order; work on regulatory reform proposals; expansion of international efforts in chemical safety including starting two major negotiations (Persistent Organic Pollutants and Prior Informed Consent) completing one of them (PIC); helping create a multinational body responsible for chemical safety (Intergovernmental Forum on Chemical Safety) and achieving harmonization of hazard classification of industrial chemicals; and significant government reinvention effort, including efforts to speed up pesticide and chemical decision making and development of the Presidential Green Chemistry Challenge Award.

California Department of Health Services, Prevention Services, Sacramento, CA.

Division Chief, Environmental and Occupational Disease Control, July 1991 – July 1993
(Public Health Medical Administrator I)

I managed a statewide program of environmental epidemiology, childhood lead poisoning prevention, birth defects monitoring and occupational health studies, with about 250 staff and \$25 million. I served as state environmental epidemiologist. I obtained legislation for a California Childhood Lead Poisoning Prevention Program funded by fees paid by industrial sources of lead contamination in California (paint, gasoline and industrial emissions.) I led the establishment of the Children's Environmental Health Network.

Branch Chief, Environmental Health Investigations, July 1990-July 1992
(Public Health Medical Officer III)

I managed a state environmental epidemiology group responsible for emergency response studies, outbreak investigations, reproductive epidemiology studies, environmental cancer research, childhood lead poisoning investigations and environmental exposure assessment. This group included 60 staff and a \$5 million budget. I established a statewide Childhood Lead Poisoning Prevention Program.

Section Chief, Environmental Epidemiology and Toxicology, June 1988-June 1990
(Public Health Medical Officer III)

I supervised an interdisciplinary team of epidemiologists, toxicologists, physicians and exposure assessors in carrying out environmental epidemiology investigations. I successfully funded a major budget initiative to expand the effort from 10 to 40 staff; co-authored the DHS cancer cluster investigation protocol; and directed studies of childhood cancer, pesticides, hazardous spills, and superfund sites. I led the development of a training program for local health agencies in risk communication and environmental epidemiology.

Unit Chief, Environmental Epidemiology, January 1986-June 1988

Medical Epidemiologist, August 1985-January 1986

(Public Health Medical Officer II)

Conducted epidemiological studies and outbreak investigations. I trained physicians and local health departments in environmental health. Helped draft legislation that established a lead poisoning surveillance system and funding population based childhood lead poisoning studies. Led investigations pesticide, hazardous waste and childhood lead poisoning in California.

ADJUNCT ACADEMIC APPOINTMENTS

Adjunct Professor, Johns Hopkins School of Public Health, August 2010-.

Assistant Clinical Professor, Department of Medicine, UC Irvine, 1993. (I resigned from all adjunct appointments in September 1993 to avoid conflicts of interest with my job in the government.)

Associate Clinical Professor, Volunteer Clinical Faculty, Department of Community and International Health, School of Medicine, UC Davis, 1992-93.

Adjunct Lecturer, School of Medicine, UC San Francisco, 1988-93.

PROFESSIONAL ACTIVITIES

Society Memberships and Leadership

American Public Health Association. Member-at-large, 1999. Governing Council, 2000-2001.

American Academy of Pediatrics. Member, Committee on Environmental Health, 1989-1995,

Classroom Instruction

Lecture: Environmental Epidemiology, UC Santa Cruz Environmental Studies Course, May 29, 1986.

Lecture: Environmental Medicine, Seminar: UC Berkeley Preventive Medicine Residency, November 4, 1987.

Lecture: Lead Poisoning: What are the Risks at Low Levels of Exposure? Research Issues in Maternal and Child Health, UC Berkeley School of Public Health, April 12, 1988,

Section Leader: UC San Francisco School of Medicine, Epidemiology for Medical Students, April – June 1988.

Lecture: Environmental Health, UC Berkeley School of Public Health Seminar for Medical Students, April 7, 1989.

Lecture: Childhood Lead Poisoning, Preventive Medicine Course, UC Davis School of Medicine, June 7, 1989.

Lecture: Public Health Screening, Introduction to Preventive Medicine, UC Irvine School of Medicine, September 7, 1989.

- Lecture: Cancer Clusters and the Environment, UC Davis School of Medicine, November 30, 1989.
- Section Leader: UC San Francisco School of Medicine, Epidemiology for Medical Students, April – June 1990.
- Lecture: Lead Poisoning: What are the Risks at Low Levels of Exposure? Research Issues in Maternal and Child Health, UC Berkeley School of Public Health, September 26, 1990.
- Instructor: Introduction to Preventive Medicine, UC Irvine School of Medicine, September 27, October 17, and October 18, 1990.
- Lecture: Introduction to Environmental Health, Orientation for Preventive Medicine Residents, UC Berkeley School of Public Health, October 11, 1990.
- Lecture: Pesticide Public Health Risks, Undergraduate Environmental Science Course, UC Berkeley, October 31, 1990.
- Lecture: Lead and Other Heavy Metals, UC Berkeley Preventive Medicine Residency, March 20, 1991.
- Lecture: Introduction to Environmental Health, UC Irvine School of Medicine, September 9, 1991.
