This document lists observations made by the FDA representative(s) during the inspection of your facility. They are inspectional observations, and do not represent a final Agency determination regarding your compliance. If you have an objection regarding an observation, or have implemented, or plan to implement, corrective action in response to an observation, you may discuss the objection or action with the FDA representative(s) during the inspection or submit this information to FDA at the address above. If you have any questions, please contact FDA at the phone number and address above.

**DURING AN INSPECTION OF YOUR FIRM WE OBSERVED:**

**OBSERVATION 1**

Your firm does not have a written SE prevention plan that is specific to each farm where you produce eggs.

Specifically, your firm did not have an SE prevention plan in place from 7/09/10 to 2/20/11 for any of your egg farms. Your current SE prevention plan dated 3/08/11 is not specific for each farm where you produce eggs.

**OBSERVATION 2**

The poultry house environmental sampling plan was not appropriate to the poultry house layout.

Specifically, the environmental sampling performed at Mac Tan Ranch on 7/29/10 was not performed in an appropriate method for the open sided single deck manure drop-through poultry houses at the Mac Tan Ranch. Sampling at Mac Tan Ranch was only performed on (b) (4) in the poultry houses.

**OBSERVATION 3**

Your written SE prevention plan lacks appropriate SE prevention measures.

Specifically, your SE prevention plan does not include cleaning and disinfection procedures for Mac Tan Ranch.

**OBSERVATION 4**

Your written SE prevention plan is not fully implemented and followed.

Specifically, your rodent control policy included with your firm's SE plan indicates monitoring and documentation of rodent bait at your laying houses on a (b) (4) basis. You are currently not documenting bait monitoring and bait replacement frequency at the Mac Tan Ranch.

**OBSERVATION 5**

You do not maintain records documenting compliance with refrigeration requirements.

Specifically, from 07/09/2010 to 03/08/2011 you produced and held nest run eggs at Mac Tan Ranch. However, you do not maintain any records documenting that the eggs were transported to the shell egg processing facility for storage at or below 45° F beginning 36 hours after the time of lay.

**OBSERVATION 6**

You did not maintain records documenting compliance with biosecurity measures.

Specifically, you have a foot bath used to sanitize shoes at the entrance to the poultry houses. You do not keep records of maintenance of the foot bath or assurance of the concentration of the sanitizer at Mac Tan Ranch.

**OBSERVATION 7**

Potential harborage for pests in and outside your poultry house have not been eliminated by removing debris within a poultry house and removing debris and vegetation outside the poultry house.

Specifically, on 3/8/11, wooden boards and standing pools of liquid were observed at the SW corner of house #1 at Mac Tan Ranch. One rodent was observed running into the laying house from under the board, and more than ten flies were observed on and around the standing liquid.

**OBSERVATION 8**

The presence of rodents is not monitored by appropriate monitoring methods.

Specifically, your rodent monitoring practices at the Mac Tan Ranch consist of visual inspection of the facility and bait blocks. You do not utilize mechanical traps, glue boards, or other appropriate monitoring methods which will help to indicate levels of rodent activity actually present in your laying houses.
