DURING AN INSPECTION OF YOUR FIRM (I) (WE) OBSERVED:

① Your written SE prevention plan is not fully implemented and followed.

Specifically,

A) Your plan states you will perform rodent indexing by monitoring (b)(4) traps (b)(4) for (b)(4). No rodent indexing has been performed to date.

B) Your plan states environmental testing for SE is to be performed on egg belts and manure belts at 45 weeks. You are testing manure pits and not manure belts. Environmental testing was performed on House #1 on 3-Aug-10 at 44 weeks and on House #2 on 14-Dec-10 at 46 weeks.

C) Your plan states foot baths are to be placed in high traffic doors and between sections. We observed one dry foot bath at the entrance into the processing plant only.

DURING AN INSPECTION OF YOUR FIRM (I) (WE) OBSERVED:

① You do not maintain practices to protect against cross contamination when employees + equipment are moved between poultry houses. Your SE plan does not address biosecurity if houses were SE positive. No documentation is maintained for the foot powder in egg pack room; frequency for changing + criteria dictating powder change.

② your written SE plan does not bear a date or carry the signature of the person(s) who administer the plan.

③ All required records do not have the signature or initials of the person performing the operation or creating the record. Rodent and fly monitoring logs do not contain initials of person recording results.
