Pheasants Type C Medicated Feed Coccidiostat

**Indications for Use**
To be used for the prevention of coccidiosis in growing pheasants caused by *Eimeria colchici*, *E. duodenalis*, and *E. phasianii*.

**Active Drug Ingredient**
Amprolium..........................0.0175%

**Guaranteed Analysis**
- Crude Protein, not less than ....................xx.x%
- Crude Fat, not less than ........................xx.x%
- Crude Fiber, not more than ...................xx.x%
- Lysine, not less than ..........................xx.x%
- Methionine, not less than .......................xx.x%
- Calcium, min and max ........................xx.x%
- Phosphorus, not less than ......................xx.x%
- Salt, min and max (if added) ..................xx.x%
- Sodium, min and max (when total Sodium exceed the furnished by the maximum salt guarantee) ....xx.x%

**Ingredients**
Ingredients as defined by AAFCO

**Feeding Directions**
Feed continuously as the sole ration.

**Caution**
Use as the sole source of amprolium.

Do not change the litter while giving this feed unless absolutely necessary.

If losses exceed 0.5% in a 2-day period, obtain an accurate diagnosis, and follow the instructions of your veterinarian or poultry pathologist.

Losses may result from intercurrent disease or other conditions affecting drug intake which can contribute to the virulence of coccidiosis under field conditions.

Fertility, hatchability and other reproductive data are not available on amprolium in breeding pheasants.

Do not use in feeds containing bentonite.

**Warning**
Keep this and all drugs out of the reach of children.

**Manufactured By**
